

July 2013

**To whom it may concern**

Brunel University engaged in a trial with Enersol Flomar with a view to reducing the amount of fuel being used in our Bannerman boiler room.

Enersol Flomar guaranteed a minimum saving of 15% and I am delighted to say that this figure has been achieved and in fact exceeded.

Enersol Flomar have been very proactive in their activities in ensure that the Savastat Units were performing as guaranteed, working very closely with our Maintenance Department, including regular on site visits and reports confirm performance and savings.

We are now considering a further roll out programme across the rest of our campus.

I am delighted with the service that Enersol Flomar has delivered and would have no hesitation in recommending their product / services to any organisation.

I would be happy to discuss the content of this letter.

Yours faithfully
