HOTEL & SPA
★★★★

To whom it may concern

Thornton Hall Hotel & Leisure Centre engaged with Enersol Flomar at the beginning of this year. They installed their Savastat boiler optimisation across our estate and their commitment to our company was to deliver fuel savings in excess of 15%.

I can confirm that they have achieved this saving for our organisation. In addition they were able to identify significant operational issues with our boilers and because of these issues it took some time for the benefits to materialise in our gas bills. Throughout this period, Enersol Flomar worked closely with our maintenance team to resolve all the problems that were detected and made themselves available, at short notice, to attend site to assist us.

We were most impressed by the quality of care given to us and their attention to detail when presenting results. There were occasions when the reports appeared to demonstrate savings but Enersol Flomar management highlighted anomalies in the data and, consequently, did not look for sign off and continued their evaluation of our boilers. Frankly, we would not have known the difference but this behaviour is a measure of the company's integrity and professionalism.

I am happy to recommend Enersol Flomar to any organisation in need of their services including my closest friends. I am happy to be contacted to discuss any element of this letter.

Yours Sincerely,

Andrew Thompson
Managing Director
